# SHAKE UP THE STATUS QUO

**AW 2025-26**

Continuous innovation has been deeply ingrained in the DNA of GTA Moda since its inception. This unwavering commitment to pushing boundaries has led the brand to consistently redefine the standards of menswear, always striving to shake up the status quo.

Founded in 1955, our brand carries a proud legacy of Italian tailoring, and this year, 2025, we are celebrating our 70th anniversary. Over seven decades, we've perfected the craft of creating exceptional trousers, blending tradition with innovation.

With an unparalleled mastery of fabrics and tailoring techniques, we are known for producing timeless garments that combine style and comfort. Whether you're drawn to classic cuts or contemporary designs, our collection offers a wide range of options tailored to suit every taste and preference.

# SHAKE UP THE STATUS QUO

At GTA Moda, shaking up the status quo means constantly questioning industry norms and seeking innovative ways to improve, rather than settling for tradition. This mindset drove us to create the Waist Comfort

Band, a bold departure from conventional waistbands and belts. On a personal level, it's about pushing boundaries, embracing growth, and continually evolving through new skills and perspectives.

# PATENTED COMFORT

We have patented\* comfort in sartorial trousers, redefining what it means to wear tailored garments. At the heart of this innovation lies our Waist Comfort Band (WCB), a revolutionary patent that blends the elegance of bespoke tailoring with the ease of joggers. This seamless integration ensures every step combines freedom with sophistication.

Traditionally, fabrics like wool, linen, and cotton have been synonymous with timeless elegance but are often associated with rigidity that compromises comfort. With the introduction of the Waist Comfort Band, these classic materials are transformed, feeling soft and flexible without losing their refined appeal.

This transformation is further enhanced through the flexibility of bias-cut fabrics. By cutting the fabric diagonally, a tailoring technique that allows for

greater elasticity, even naturally stiff materials like wool and linen gain a fluid adaptability. The result is trousers that move effortlessly with the body while preserving their polished, tailored silhouette.

Central to this innovation is the adaptive waistband. The Waist Comfort Band's design includes a bridge fabric and flexible stitching, enabling it to align with every movement. Whether sitting, walking, or stretching, the waistband adjusts dynamically, delivering unparalleled comfort throughout the day without compromising its refined appearance.

Every detail of the Waist Comfort Band is crafted to improve comfort and durability. Flexible threads, soft pocket linings, and strategically placed reinforcements work together to create a balance of practicality and elegance.

# GREEN GLAMOUR

Our commitment to comfort and environmental protection is evident in our fabric selection.

We partner exclusively with suppliers who are part of the ZDHC Roadmap to Zero program, ensuring our materials meet the highest chemical safety standards in the textile industry.

We also adhere to the OEKO-TEX Standard 100 certification, guaranteeing our fabrics are free from harmful substances. This certification reflects our dedication to both eco-friendliness and human health, with fabrics undergoing rigorous testing for both regulated and non-regulated substances to earn this prestigious label.

# Elia

Comfort-fit model featuring an extra-wide, shaped leg with pleats at the knee and a regular waist. Designed with spacious fatigue pockets, a back work-style pocket on the right side, and additional applied pockets at the rear.
